

## BUHexa-Cover R90® en R114®

**BUHexa-Cover®** is a patent floating cover system for water storage tanks.

This unique system covers the surface of your tank for 99% and the perfect solution for covering storage systems.

This floating system will reduce 95% of evaporation and up to 95% of constant reduction of emission. Further, the system will create up to 90% reduction of odors.

The **BUHexa-Cover®** is based on 28 tiles per m<sup>2</sup> which are integrated automatically to a homogenous cover system. The **BUHexa-Cover®** tiles are supplied in big-bags and the tiles are simply poured on the surface, where the **BUHexa-Cover®** tiles covers the liquid.

### Advantages:

- ✚ 99% covering of the surface and as a result no algae growth.
- ✚ 95% reduction of evaporation.
- ✚ 90% reduction of odor.
- ✚ High wind resistance, wind velocities up to 32 m/s.
- ✚ No damaging of liner material by wind.
- ✚ Easy installation.
- ✚ Automaticly homogenous covering.
- ✚ Lifetime expectancy, well above 10 years.
- ✚ Minimum maintenance costs.
- ✚ Unaffected by rain, snow and frost.
- ✚ Unlimited access to the liquid.
- ✚ Re-useable.
- ✚ Covering a wide range of liquids.
